TOPOLOGY AND ITS APPLICATIONS
VOLUME 44, NUMBERS 1–3, 22 MAY 1992

SPECIAL VOLUME
PROCEEDINGS OF THE SYMPOSIUM ON GENERAL TOPOLOGY AND APPLICATIONS, OXFORD, 1989

Abstracted/Indexed in: Mathematical Reviews.

CONTENTS

Preface 1

Symposium Lectures 3

List of Participants 7

M. Hušek and J. Pelant
Zdeněk Frolík 1933–1989 11

K. Alster
Some remarks concerning the Lindelöf property of the product of a Lindelöf space with the irrationals 19

A.V. Arhangel'skiĭ
The general concept of cleavability of a topological space 27

Z.T. Balogh and D.K. Burke
A total ladder system space by ccc forcing 37

M. Brod
Spaces with no uncountable submetrisable subsets 45

L.M. Brown
Semi-sequentially normal bitopological spaces 57

D.K. Burke
Closed discrete subsets in first countable, countably metacompact spaces 63

G. Castellini, J. Koslowski and G.E. Strecker
A factorization of the Pumplün–Röhrl connection 69

J. Chaber
Two subclasses of the class MOBI 77

E. David and M. Erné
Ideal completion and Stone representation of ideal-distributive ordered sets 95

A. Di Concilio
Uniform properties and hyperspace topologies for $\aleph$-uniformities 115

A. Dow
On the consistency of the Moore–Mrówka solution 125

B. Fitzpatrick Jr, J.M.S. White and H.-x. Zhou
Homogeneity and σ-discrete sets 143

P. Fletcher and W. Hunsaker
Completeness using pairs of filters 149

G. Gruenhage
A note on the point-countable base question 157

V. Gutev, S. Nedev, J. Pelant and V. Valov
Cantor set selectors 163

R. W. Heath
Some nonmetric, first countable, cancellative topological semigroups that are generalized metric spaces 167

M. Henriksen and R. Wilson
When is $C(X)/P$ a valuation ring for every prime ideal P? 175

H. Herrlich
Hyperconvex hulls of metric spaces 181

M. Hušek
Productivity of properties of topological groups 189

I.M. James
The Lusternik–Schnirelmann theorem reconsidered 197

I. Juhász and S. Shelah
On partitioning the triples of a topological space 203

H. Junnila and Z. Yun
$\aleph$-spaces and spaces with a σ-hereditarily closure-preserving k-network 209

A.J. Macula
α-Dedekind complete archimedean vector lattices versus α-quasi-F spaces 217

E. Michael
Partition-complete spaces are preserved by tri-quotient maps 235

J. van Mill
Sierpiński's technique and subsets of $\mathbb{R}$ 241

P.J. Moody
A construction that yields a nonacyclic monotonically normal space 263

P.J. Nyikos
Hereditary normality versus countable tightness in countably compact spaces 271

P.J. Nyikos and H.-C. Reichel
Topological characterizations of ω_μ-metrizable spaces 293

P.J. Nyikos and J.E. Vaughan
The Scarborough–Stone problem for Hausdorff spaces 309

S. Purisch
Friendship destroys orderability via clustering pseudogaps 317

G.M. Reed and D.W. McIntyre
A Moore space with calibre (ω_1, ω) but without calibre ω_1 325

I.L. Reilly
On non-Hausdorff spaces 331

J.T. Rogers Jr
Classifying homogeneous continua 341

F.D. Tall
More topological applications of generic elementary embeddings 353
